

America

Question: is America a place or is it a State of Consciousness? When seen in its spiritual connotation it must obviously be the latter.

Thus no one has to come to America but needs only to realize the reality of government under God, no matter where they are located. America is a symbol for freedom and freedom is with God, this is everywhere present, active and complete.

America was founded on the law of God, Principle (seen at the highest level of understanding of that day), that can evolve, but never change, for that is what America is, a symbol for the law and government of God. A government of laws and not people.

A symbol can be translated to its basic idea (God, Principle) a thing, a place cannot.

We today are presented via the media all the age-old pictures of "good and evil". Divine Science operating at the level of Christian Science corrects this misconception with the one value system – God good is All-in-all of which there is no other.

Only as we individually see this point can we dehypnotize the situation, disconnect from the mortal picture. Then we will see and demonstrate here and now heaven, harmony – all things working together for good – thus we have a unified field," the "Unity of Good"
