

Desire for Liquor and Tobacco Disappeared

I first heard of Christian Science four years ago. At that time drinking and smoking were my comforters. I had no other companionship. I had lived almost constantly from childhood in an evil atmosphere. Though I was far from being satisfied with my condition, I failed to see how to better it until I read *Science and Health*. I used occasionally to listen to a sermon, but sermons did not give me any more comfort than I derived from my pipe, hence I concluded that church-going could not satisfy me and I preferred drinking and smoking. When I began to read *Science and Health*, I saw it offered something substantial. After a few months' study all desire for drinking and smoking disappeared. I did not give them up; I made no sacrifices, I simply found something better. I might mention that I had smoked ever since I can remember. I used to smoke years before I left school, and, like most Englishmen, loved my pipe, and would almost prefer to miss a meal rather than to go without my smoke. I used to think it gave me comfort.

During my four years' study of Christian Science I have not spent a cent for doctors or medicine, neither have I lost a day from my work on account of sickness, which compares wonderfully with the previous four years. I take a great interest and pleasure in reading the Bible and studying the lessons in the *Quarterly*. The Bible used to be a most mysterious book to me, but *Science and Health* makes it a most precious book, making its meaning clearer, plainer, and simpler.

I take this opportunity to express my gratitude to Mrs. Eddy and to the friend who invited me to attend the service held in the Auditorium years ago. I also wish to acknowledge the benefit I have had from the *Journal* and the *Sentinel*. They have helped me wonderfully. If the value of *Science and Health* and these publications were measured as business men value things, by the results or benefits they bring, they certainly would be priceless to me. It would be impossible to measure their value, as I have got something from *Science and Health* that all the money in the world could not buy.
