

The Law of Divine Translation

accent on process - translation - individualization
 how subjective Being translates Itself to objective ideas

Truth	Life	Love
The whole of Being	translates Itself to individual ideas	each idea evidencing the perfection of the whole
the Truth of all Truths	focusing in on specific truths	meeting the need bringing right solutions
The Christ consciousness	translates to individualized Christ consciousness	is universal savior
The one Truth	stroboscopes Itself (focuses in upon the specific calculations of its Being)	each calculus being a full representation of the one Truth/ the process not reducing the whole
computer storage of the whole	scans for specific truth/ fact/ information/ idea	adapting to the need fulfilling the divine purpose
mortal suggestion: that the whole of Being the whole of Truth	doesn't individualize itself doesn't reduce itself to specifics or apply itself to specific situations in my life	consequently that it doesn't bring out the truth in every situation; that it doesn't meet the need, mine or anyone else's
