

# THE MODEL OF BEING AND ITS LAWS

Presented by:  
Marya Brunson

This book is a companion piece to the talk on  
"THE MODEL OF BEING AND ITS LAWS" given in  
Lake Forest in May of 1987.

It is not its intention to take the place of those  
that have gone before but to offer a new perspective,  
one designed to aid consciousness as it makes its  
transition into the next millennium.

With this in mind I respectfully submit it to your care.

## Method of exploration

- A. Obstetrics - Open to the higher dimension; open to spiritual law
- B. Self-abnegation - Let go of self; preconceived identification and response
- C. Start from the whole; from infinity - allowing it to elucidate itself dimensionally; operationally
- D. Focus on the specific law - explore through exercise
  - penetrate the depth of its concepts allowing dissolution of former, limited concepts;
  - internalize the law; yield to its power;
  - allow it to apply itself; to transform the counterfeit within;
  - allow it to operate without restriction in its universe (which includes the universe of our being)

## Example of possible exploration focusing on Being through its synonym Truth:

There is one Being, being the infinitude of its own Being  
It is an indivisible Being, conscious only of itself, that which it is  
Expressing itself as a whole, as the infinite One, the infinite Principle

This Being is expressing the nature, essence and wholeness of its Being  
as the matrix of Mind, Spirit, Soul, Principle, Life, Truth, Love.

As this Being is its own infinite Being, it would be implied that every  
aspect of this Being (M-Lo) is its own infinite Being as well.

Therefore, Being (in its focus as Truth) is its own infinite Being;  
Truth, its own infinite Being, its own infinite Truth.

<u>Truth</u>	<u>is its own infinite</u>	<u>Truth</u>	
Truth	is its own infinite	7 fold Truth	therefore
Truth	is its own infinite	<u>Mind of Truth;</u>	the power and activity of itself, of Truth
		<u>Spirit of Truth;</u>	the inf. reflection of itself as the one and only Truth
		<u>Soul of Truth;</u>	the inf. withinness of Truth, the center and circumference of its own being
		<u>Principle of Truth;</u>	the structure and system of its own being, interpreting itself anew, infinitely proving the Truth of its own being
		<u>Life of Truth;</u>	the inf. existence and experience of itself
		<u>Truth of Truth;</u>	the infinite self-consciousness of Truth
		<u>Love of Truth;</u>	the all-inclusive, integrated, holistic model of Truth

Truth	is its own infinite	"numeral" of Truth	therefore

## Exploring the Law of Individualization through exercise:

Truth	Life	Love
The whole ideal of Being	is transforming itself to specific ideals	each ideal being perfect and having integration within the whole
The Truth of all truths	is able to focus in upon the specific truth; calculus	the correct and appropriate truth being brought into focus in every instance
The whole consciousness of Being	is able to stroboscope itself; to focus in upon its individualized consciousness	without fragmenting that individualized consciousness from the whole
The Christ consciousness	individualizes; appearing as individualized Christ consciousness	savior to the belief that individual consciousness might not be of the Christ; the whole Truth
The consciousness of the whole of Being (M-Lo)	is individualizing, specifying, translating, strobing itself	and in the process loses none of itself
The Mind of the Christ The Spirit of the Christ The Soul of the Christ The Principle of the Christ The Life of the Christ The Truth of the Christ The Love of the Christ	is the Mind, Spirit, Soul, Principle Life, Truth, Love of its individualized Christ ideal (that which appears as the individualized consciousness of "my" being)	which is savior to the belief that "i" could have a mind, spirit, soul, principle, life truth, love apart from the Christ ideal

The power of the Christ The reality of the Christ The identity of the Christ The operation of the Christ The existence of the Christ The form of the Christ The integration of the Christ	is the power, reality, identity, operation, existence, form, integration of its individualized Christ consciousness, therefore the individual consciousness of "my" being	which saves "me" from the belief that power, reality, identity, operation, existence form, integration could belong solely to an individual and be derived from a source other than the whole Christ consciousness of Being; saves from the belief that counterfeited qualities could be brought out in "me"

### Love

therefore not:

that "I" has to father itself  
that Life (our good) can be taken away; not eternal

that "I" has to mother itself  
that God (Love) will not protect

## Exploring the Law of Eternalization through exercise:

### Life

Being eternalizes its own objective state;  
the idea of its Being

that which has been objectified is eternally maintained, sustained, conserved, fed, upheld by its Principle, the divine parent, the divine subjective Being that caused it to be

As the nature of the divine, subjective Being, the divine parent is Mind, Spirit, Soul, Principle, Life, Truth and Love, it can be seen that each of these aspects of Being is fathering the idea as well

Mind	}	are eternalizing their objectified state; that which they have brought forth as idea, by their ability to father (provide, project, maintain, support, feed, give to, sustain, promote, uphold) their idea; to give unto it all that they are; the 7 x 7 reflection of their being.
Spirit		
Soul		
Principle		
Life		
Truth		
Love		

(can be seen in depth by focusing upon the 7 fold reflection of each synonym as well as their numeral characteristics)

As Being eternalizes its objectified state it eternalizes the appearances of this state whether as "the compound idea" or as that which appears as "man." Consequently, the real man (that which we really are) is forever fed by the Life force, the fatherhood of Being and need not turn to any lesser source for its provision (not even to its own independent efforts) but must rely on the eternal support system that operates for its benefit

### Love

Being preserves its own objective state;  
the idea of its Being

that which has been objectified is always preserved, accepted, embraced, contained, nurtured, held, protected and cared for by its Principle, the divine parent, the divine, subjective Being that caused it to be

As the nature of the divine, subjective Being, the divine parent is Mind, Spirit, Soul, Principle, Life, Truth and Love, it can be seen that each of these aspects of Being is mothering its idea as well

Mind	}	are preserving their objectified state; that which they have brought forth as idea, by their ability to mother (embrace, enfold, accept, take in, contain, nurture, hold, protect) their idea; to embrace it within their infinite Self-containment, the matrix of their being, preserving its holographic placement and purpose
Spirit		
Soul		
Principle		
Life		
Truth		
Love		

As Being embraces its objectified state it embraces the appearances of this state whether as "the compound idea" or as that which appears as "man." Consequently, the real man (that which we really are) is forever preserved by the infinite Self-containment of Love, which in its motherhood does not allow one facet of its being to be ejected from the protection of its matrix/womb, where it could believe itself to be abandoned, lost, frightened, open to the danger of disintegration

## Law of Spontaneity

## Exercising the Law of Spontaneity through exercise:

### Law of Divine Impulsion

Being has a deep creative urge within itself to express that which it is; its divine input

Being(M-Lo) is bringing forth

Mind-Love are impelling

Ex: Mind is impelling

### Law of Individualization

Being has the operational power within its deep consciousness to process the "information" of its Being and in so doing is able to bring out micro models of itself; each micro model ordained to fulfill a specific goal within the whole.

In order to do this it is able to focus in upon specific configurations within its consciousness; arrange and consider the specific equations and/or calculations necessary to produce these ideal models

the micro models of its Being (M-Lo)

the numerals of their being into existence

the power of its information into existence

### Law of Eternalization

Being is able to holograph its micro models into a crystalline macro model where every facet, every component part, every micro model is sustained and preserved by the deep fatherhood and motherhood activity of its Being

integrating them into a holographic macro model; a self-maintaining, self-preserving model of of their being (M-Lo)

Forever maintaining and preserving them in their objectified state

eternalizing and preserving the power of its information

### Law of Pre-established Form

Being is thus established as a cybernetic model, capable of restructuring itself in such a manner as to overform its basic form yet retain its intrinsic equilibrium

From this vantage point it has touched into the source of its Being (W) gathering the "info" required to produce this new form (Ch) which it holographs into a self-sustained whole (Cty) like unto that which it sprung forth from but unique in its internal patterning

which has been pre-ordained within the cybernetic model where it is fully integrated and fulfilling its pre-established purpose

integrating them into their being in such a way as to bring out the infinite differentiation of their being without altering the intrinsic character of their nature

which it overforms within the cybernetics of its being, the cybernetics of its Mind.

From the depth of the onliness of its **Spirit** Being is bringing forth its 7 fold *reality*  
which obliterates the illusion that anything else could  
bring forth reality;  
and causes the latent reality factor within me to  
purify its atmosphere; disposing of its seeming materialism

From the depth of the Ego of **Soul** Being is bringing forth its 7 fold *I Am-ness*  
which obliterates the illusion that anything else could  
bring forth the character of the I Am;  
and causes the latent identity factor within me to  
reform me in accordance with the sinlessness of my true character;  
causes me to abnegate my sensory selfhood

From the depth of the one, infinite **Principle** Being is bringing forth its 7 fold *structure/ model*  
which obliterates the illusion that anything else could  
bring forth an infinite structure-model;  
and causes the latent, deep structure factor within me to  
recoordinate the fragments of its organization in obedience to  
the divine model

From the depth of the isness of its **Life** Being is bringing forth its 7 fold *being*  
*existence*  
which obliterates the illusion that anything else could  
bring forth existence;  
and causes the latent Life factor within me to flourish  
as "i" lay down the mortal sense of "my" life

From the depth of the consciousness of **Truth** Being is bringing forth its 7 fold *ideal*  
which obliterates the illusion that anything else could  
bring forth an ideal; a form infused with all the right factors;  
and causes the latent Truth factor within me to awaken  
"my" consciousness to the correct factors of its idealized state

From the depth of the perfection of **Love** Being is bringing forth its 7 fold *integrated being*  
which obliterates the illusion that anything else could  
bring forth completeness; anything else could produce  
a united sphere of integrated oneness; a holistic uni-verse;  
and causes the latent integration factor within me to  
reunite me with the divine holographic model of its  
celestial being

therefore:

that which causes "me" to seek is the divine Mind  
it cuts through the veil of illusion and brings the light of its divine ideas

that which causes "me" to choose the spiritual is the divine Spirit  
it unfolds the spiritual journey that separates "me" from materiality

that which causes "me" to abnegate self is the divine Soul  
it exchanges "my" animal, psychic instincts for its superior spiritual instinct;  
its spiritual sense

that which causes "me" to relinquish all lesser loyalty is the divine Principle  
it requires "my" obedience to its deep structure and de-programs "me" from all  
sense of person

that which causes "me" to lay down the mortal sense of life is the divine Life  
it exalts "me" above time and the cycling of mortality; beyond the seeming  
appearances of death

that which causes "me" to affirm the Truth is the divine Truth  
it alters "my" consciousness thereby giving "me" dominion over the erroneous  
calculus of lesser paradigms

that which causes "me" to unify with "God" is the divine Love  
it saves "me" from the void of excommunication as it holds me in the united oneness  
of its integrated being

## Law of Transformation

	Synonyms	Divine Subjective/ Objective	Human	
			when we let it happen	when we resist it
subjective	<b>Principle</b>	potential power	divine authoritative power	imperative power
	<b>Life</b>	dynamic power	generating power	irrepressible power
	<b>Truth</b>	conscious power	applied/alterative power	annihilating power
	<b>Love</b>	total power	perfecting/saving power	enforcing power
	<b>Soul</b>	identifying power	transforming power	suffering
objective	<b>Spirit</b>	ordering power	purifying power	chemicalization/crisis
	<b>Mind</b>	manifesting power	enlightening power	animal magnetism

## Exploring the Law of Transformation through exercise:

**The operative power that lies deep within the consciousness of Being and is intrinsic to its model is thereby intrinsic to the micro models of that Being, enabling them to calculate in concordance with its own divine processing plant.**

Thereby stored in the micro processor of these individualized models

lies the <i>potential power</i> of its <b>Principle</b>	which dominates and regulates the activity of the micro-processors of these individualized models
lies the <i>dynamic power</i> of its <b>Life</b>	which stimulates the activity of the micro-processors giving them the impetus and energy to calculate
lies the <i>conscious power</i> of its <b>Truth</b>	which enables the micro-processors to adhere to the divine standard that operates in the processing plant of the consciousness of Being. It programs them with divine configurations and computations and allows only correct calculations to occur in the process of the work
lies the <i>total power</i> of its <b>Love</b>	which assures that only wholes will ever be computed; and that every factor will be engaged in the computation
lies the <i>identifying power</i> of its <b>Soul</b>	Which assures that the models being brought forth by the micro-processors are in keeping with the nature of the divine model
lies the <i>ordering power</i> of its <b>Spirit</b>	which assures the new models transparency to the divine order of the inner flow; that they may reflect its environment so purely as to be isomorphic (patterned after the divine)
lies the <i>manifesting power</i> of its <b>Mind</b>	which guarantees the "information" (in-form-ation: the form of manifestation) of the new models; the exemplification of the divine model

Therefore nothing can go awry in the transformation process that occurs within consciousness, be it occurring within the divine model itself or the individualized micro models of its being. In every instance the process is efficient and will not allow mistransformations to occur. It will in every case:

control the transformation; letting the process stem from the deep reservoir of its power (P)  
generate the transformation; accelerating the process with its kinetic power (Li)  
realize the transformation; altering form with the aid of its conscious power (T) which is never blind  
fulfill the transformation; engaging its total power toward that goal (Lo)  
identify the transformation; transmitting the transfigured form; the new form (So)  
order the transformation; reflecting its prismic patterns (Sp)  
manifest the transformation; envisioning its ideational in-form-ation

In so doing it will automatically:

establish itself as the authoritative power

imperatively demanding that the micro processor of "my" being activate itself by virtue of this power

operate as a generating power

irrepressibly pushing itself upon the micro processor of "my" being, removing all obstruction

operate as an alterative power

obliterating any resistance to its use by the micro processor of "my" being by permeating consciousness

operate as a saving power

enforcing its full use by the micro processor of "my" being until the whole of it is divinely engaged

operate as a transforming power

which transmits through spiritual sense and rebukes all psychic or physical conductors

operate as a purifying power

which excludes the chaotic prismatic that leads to opacity

operate as an enlightening power

which heals the seeming magnetism of an independently processing consciousness  
dimmed by the manifestation of its thought forms

consequently:

this power will come and knock upon my door until "i" let it control

it won't be pressed down, but will push through any resistance that "i" may have

until it crushes and breaks down "my" erroneous consciousness

ultimately forcing "me" to accept its saving mission

thereby allowing me to relinquish

suffering

crisis or chemicalization

animal magnetism

as necessary tools of transformation

## Exploring the Law of Universal Reflection through exercise:

**Being turns its micro models into one self-sustaining, self-preserving uni-verse; a holographic macro model; a divine transparency in which every facet supports itself and the whole, consciously recognizes the divinity of itself and the whole, accepting its special position and that of every other facet within the whole.**

This occurs as Being

Centers its micro models on its axis fixing them in exact structural position creating a holoaxial;		<b>Principle</b>
a crystalline realm, illumined from within		<b>Mind</b>
each reflecting plane is a prism; each micro model facet of the nature of the Being that encoded it		<b>Soul</b>
in its complete symmetry it is a supreme, shimmering, holographic transparency in which		<b>Spirit</b>
every facet sustains itself and the whole	"fatherhoods"	<b>Life</b>
every facet is in full recognition of itself and the whole	"sonships"	<b>Truth</b>
every facet accepts the special holographic position of itself and that of every other within the whole	"motherhoods"	<b>Love</b>

### **In this crystalline, holographic transparency:**

each facet sustains itself and every other facet with the divinity of its nature  
it supplies, supports, gives, floods, projects forth, maintains, sustains, provides  
that which it is (its 7 fold nature) for itself and every other facet

it "fatherhoods" itself with the qualities of Mind, Spirit, Soul, Principle, Life, Truth, Love  
it "fatherhoods" every other facet with the qualities of Mind-Love  
every other facet "fatherhoods" itself with the qualities of Mind-Love  
every other facet "fatherhoods" every other facet with the qualities of Mind-Love

each facet possesses the true recognition of the divinity of itself and that of every other facet  
it affirms, claims, confirms, takes possession, is heir to, consciously recognizes  
that which it, and what every other facet of the whole is.

it "sonships" itself with the qualities of Mind-Love  
it "sonships" every other facet with the qualities of Mind-Love  
every other facet "sonships" itself with the qualities of Mind-Love  
every other facet "sonships" every other facet with the qualities of Mind-Love

each facet accepts the divinity and holographic positioning of itself and that of every other facet  
it embraces, accepts, protects, preserves, cherishes, anticipates the hope, completion of all  
for itself and every other facet of the whole

it "motherhoods" itself with the qualities of Mind-Love  
it "motherhoods" every other facet with the qualities of Mind-Love  
every other facet "motherhoods" itself with the qualities of Mind-Love  
every other facet "motherhoods" every other facet with the qualities of Mind-Love

As every micro model is a model of the divine Being, it is thereby controlled and regulated by that Being, centered on its axis, fixed in its structure.

It cannot isolate itself from this supreme structure or maintain itself as an independent operator but must align as its PRINCIPLE decrees.

As this applies to the micro model of my being, "i" too cannot attempt to regulate my being independently of this Principle; function as a personal "i" but must be principled and allow the Being to center me on its axis and fix me within its structure; function as it would decree

As Being has compounded its micro models into a "crystal" system; a holohedral realm, illumined from within

It would exclude the possibility of their existing in any other realm

As this applies to the micro model of my being, "i" cannot attempt to exist in any other realm or be illumined or enlightened by any other source; but must know what it knows, perceive as it perceives, not adhering to a thought force other than its own, not mystified by belief and illusion.

The entire holohedral realm, the entire macro model is of the nature of Being ( 7 X 7 )

which would exclude the possibility of it being identified in any other way; and as such it cannot sense itself to have an ego separate from that Being; a "face" fragmented from the other faces of the holohedral; a face of its ( my ) own. The symmetry cannot be broken

The macro model is a shimmering, holographic transparency in which each facet reflects the other

which excludes the possibility of monographic opacity where the whole is in chaotic arrangement unable to focus and reflect; a di-verse rather than a uni-verse where the constituents could be self-absorbed fragments

Within this holographic transparency each interconnected facet is feeding itself and its collective parts the qualities of Being; that which sustains its life

which excludes the possibility that it could ever with-hold the qualities of Being from itself or or its collective being, rob or impoverish it, be competitive or critical within it

Within this holographic transparency each interconnected facet is conscious that the whole "is heir to the kingdom," to all that Being is

which excludes the possibility that it could ever deny or negate what the whole of it is; negate any quality or function of this compound whole

Within this holographic transparency each interconnected facet is truly integrated, universal, ever nurturing the whole from its special holographic position; ever embracing, ever available, ever glorifying the whole with the outpouring of its love

which excludes the possibility that it could ever be ejected or disintegrate itself from the whole, from the holographic "crystal," live in a void, a vacuum devoid of divine purpose or communion; alone.

## Law of Structured Understanding

synonyms	divinely scientific understanding	human understanding via Science	unscientific understanding
<b>Soul + Life</b> numerals Word	structured upon 7, the unchangeable identities of being	as we spiritually understand 7, so are we	mortal beliefs produce mortal existence (counterfeit of 7)
<b>Spirit + Truth</b> calculus Christ	calculating in accord with 4; allowing it to order facts, combine elements to determine form	as we calculate in accord with 4, allowing facts to restructure, new form brought out	calculating humanly leads to false conclusions (counterfeit of 4)

## Exploring the Law of Structured Understanding through exercise:

**Within the omniactivity of the deep structure of Being, Being is enfolding the patterns of its being causing them to undergo a transmutation of appearance.**

In so doing it:

taps into the wellspring of its Being allowing its qualities to \*resonate and \*revelate within its being

it then \*releaves the specific calculations or configurations of its consciousness that it may reconfigure, restructure them in order to bring out the new pattern; the new form

which it then \*enfolds into the whole of its being where it proceeds to give to the whole its unique patterning, confirms its relationship to the collective patterning and integrates into the general holography with harmony and love.

forever playing its part in the holomovement of the model of Being

Encoded from within these patterns are always of the nature of the Being that conceived them; the nature of the 7 (Mind, Spirit, Soul, Principle, Life, Truth, Love)

their form determined by the inner calculus that occurs within the consciousness of Being

their purpose and placement within the holographic matrix predetermined and reflected by all

allowing them to consciously function as an interdependent model within the whole

thus it is that the model (or pattern) of our being must be:

encoded with the nature of Being itself; the nature of the 7

that we must calculate in accord with its 4 fold operation

discover our divine, holographic relationship with all other facets in order to fulfill Love's design

operate in accord with the Science and system of the governing Principle of Being

lest we sit in:

mortal beliefs; the counterfeits of the 7 which produce mortal existence

calculate humanly; at random; leading ourselves to false conclusions; the counterfeit of the 4

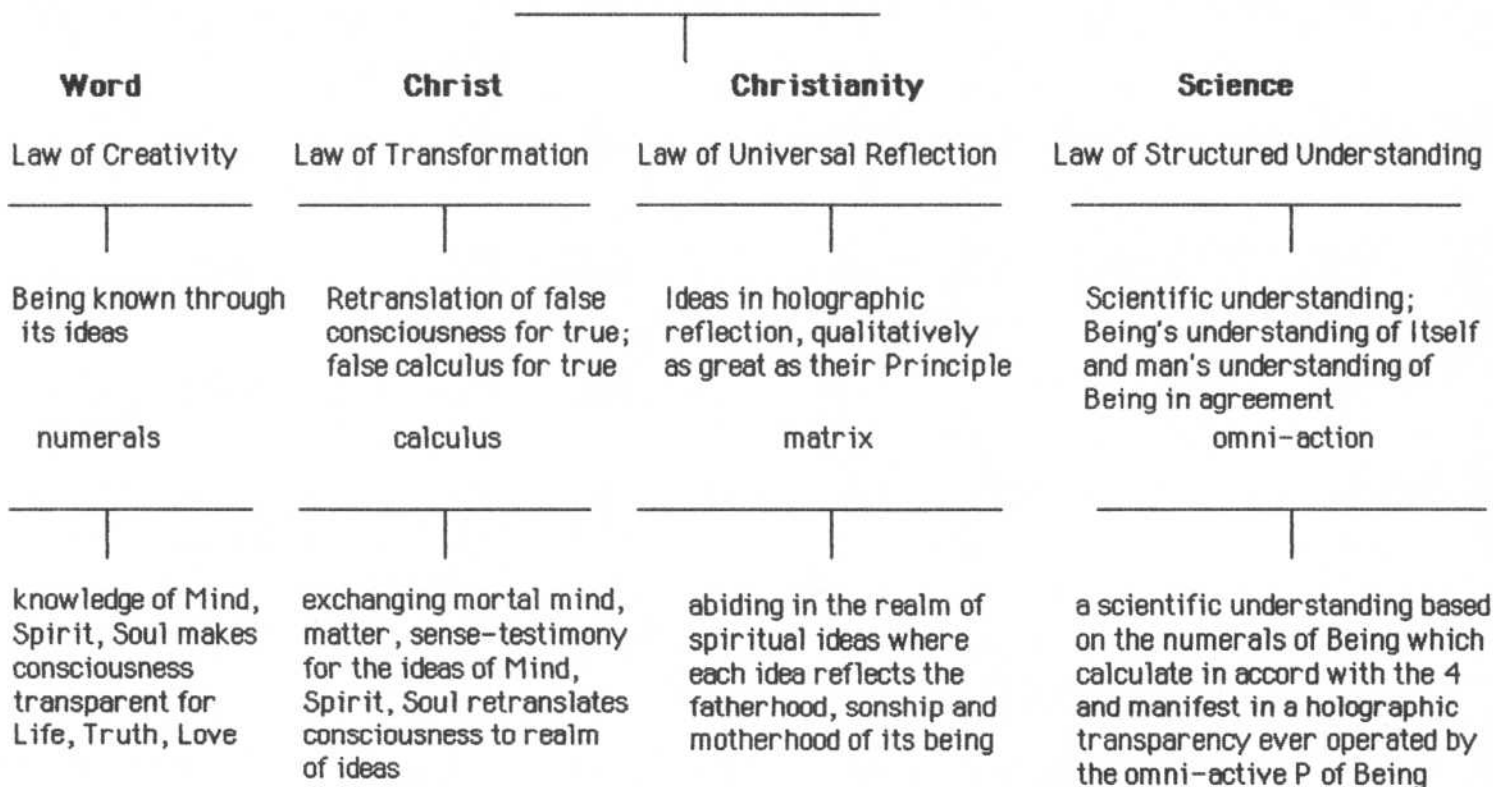

sit in monographic isolation; a state of universal deflection in which we reject the whole and are likewise rejected

operate independently of Science and system thereby burying ourselves in outmoded paradigms

## Law of Causality

## Exploring the Law of Causality through exercise:

### Law of Creativity

---

Being is bringing the knowledge of its Being to light

Being is creatively unfolding that which it is; allowing each state of its form to disclose itself in turn

As Being reveals its nature to be Mind, Spirit, Soul, Principle, Life, Truth and Love, it unveils the belief of a counterfeit nature

### Being

---

Mind  
Spirit  
Soul  
Principle  
Life  
Truth  
Love

reveal  
their  
nature

### Law of Transformation

---

forcing what appears as human consciousness to yield its false ideal; to correct its miscalculations; discover the divine micro model of its being

forcing what appears as human consciousness to yield its false forms; the false models that ensnare and diffuse it

causing consciousness to relinquish its false masters; to translate out of the false calculus of mortal mind, matter, sense testimony to its ideal state

which re-translates the false appearances of their nature, apparently brought forth by a counterfeit creator

### Law of Universal Reflection

---

centering it on its axis where it can relocate its holographic position and purpose; be an active participant in the macro model

allowing it to abide in the macro realm of transparent form where spiritual micro models inhabit the faces of a "crystalline" totality

where it can reflect with others of its kind in a mutually supportive atmosphere; each giving to the other, confirming the other and embracing the other in spiritual brotherhood

The deflection of mortal manhood gives way to a true humanhood and ultimately to the spiritual brotherhood of the divine macrocosm

### Law of Structured Understanding

---

regaining an understanding of itself that is synonymous with that of the model of Being

establishing it within the cybernetic model where it can alter form in concordance with its transparency to the true model

shifting paradigm at the will of its divine Principle; transfiguring; leaving behind the outmoded forms of its unscientific understanding

Scientific understanding dissolves mortal existence, its false calculus and total disunity. It dissolves the millenniums of mortality.

## GLOSSARY

calculus:	A method or process of reasoning by computation of symbols. (Webster)
category:	One of the underlying forms to which any object of experience must conform. A division within a system of classification. (Webster)
classification:	Systematic arrangement in groups or categories according to established criteria. (Webster)
chart	A form designed to record or provide information quickly and simply especially about something fluctuating or changing; table, graph, diagram; a map; an outline map showing certain field conditions or facts. A graphic representation of reality.
"The Chart"	The chart symbolizes the nature, the interrelations and the whole dynamics of spiritual Being; it is a model of divine cybernetics which includes the 15 root notions of spiritual Being: The seven synonymous terms for God, the fourfold operation of God and the four levels of spiritual consciousness through which the whole range of spiritual Being can be symbolized from the infinitesimal to the infinite. (Kappeler: 'The Four Levels of Spiritual Consciousness')
cybernetics:	Coined by Norbert Wiener from the Gk. Kybernetes: pilot, governor; and also from Kubernan: to steer, guide, govern. The study of systems which are self-regulating, self-controlling, self-operating through their feedback mechanism to exercise adaptive control. (Study guide) The theoretical study of control processes in systems, especially the mathematical analysis of the flow of information in such systems. If an error in the system should appear, information about this error is fed back to the controlling device which then automatically acts to correct the error.
code:	A systematized body of law. A set of signals, characters, or symbols used in communication. (Funk and Wagnalls) The particular way in which information is entered into the computer.
coding:	To systematize as laws. To put into the symbols of a code.
encode:	To transfer (as a body of information) from one system of communication into another. To convert (a message) into code.
enfold:	Embracing; encircling; to cause to be embraced endlessly; endless embracing
gestalt:	A structure or configuration . . . so integrated as to constitute a functional unit with properties not derivable from its parts in summation. The pattern or figure assumed by a gestalt structure or system. (Webster)
grok	A term coined in Gestalt psychology during the 1960's. Receiving a deep, comprehensive impression of something especially with regard to relationship within the context of a whole. A holistic grasp of information at any level of consciousness. Internal integration of information.
holism:	A philosophical theory first formulated by Jan C. Smuts which postulates that the determining factors in nature are wholes which are irreducible to the sum of their parts and

that the evolution of the universe is the record of the activity and making of these wholes. (Webster)

- holistic:** The quality or state of holism which emphasizes the organic or functional relation between parts and wholes. (A holistic rather than an atomistic approach to the study of culture) (Webster). Reasoning and perceiving from the largest possible frame of reference.
- holoaxial:** A crystal system: having all the axes of symmetry possible.
- holograph:** A document wholly in the handwriting of its author. (Webster)
- holography:** The mathematical principle of holography was discovered by Dennis Gabor in 1947 but a demonstration of holography had to await the invention of the laser. It is a method of lensless photography in which the wave field of light scattered by an object is recorded on a plate as an interference pattern. When the photographic record, the hologram, is placed in a coherent light beam like a laser, the original wave pattern is regenerated and a three dimensional image appears. Any piece of the hologram will reconstruct the entire image.
- holographic theory:** Our brains mathematically construct "concrete" reality by interpreting frequencies from another dimension, a realm of meaningful, patterned primary reality that transcends time and space. The brain is a hologram interpreting a holographic universe.  
... Phenomena of altered states of consciousness (which reflect altered brain states) may be due to a literal attunement to the invisible matrix that generates "concrete" reality. . . .An eerie property of both hologram and brain is the distribution of information throughout the system, each fragment encoded to produce the information of the whole.  
(Karl Pribram, brain researcher, Stanford University from "The Holographic Paradigm & other paradoxes)
- holohedral:** Having all the faces required by complete symmetry. (Webster)
- divine holograph:** A symbolization of universe; a divine, flowing transparency; a self-sustaining, self-preserving, "crystalline macro model in which every facet contains the program of the whole and forever feeds this information into the whole from its unique position. (a graphic symbol to illustrate the order of "Christianity as it intersects the levels of absolute CS and CS)
- intrinsic:** Belonging to the real nature of a thing; not dependent on external circumstances; essential; inherent.
- isomorph:** Something identical with or similar to something else in form or shape or structure.
- matrix:** The womb, place of origin, cradle ('the place in which anything is nurtured in its earlier stage', Oxford) source, cause; grid, chessboard pattern  
A schematic model of order displaying columns and rows or lines, which are constructed according to definite rules. The essential requirement is that all the elements in a column or row possess a common characteristic. Thus a matrix is a rectangular array with columns (vertically) and rows (horizontally). The columns are indicated by an index, the rows or lines by another. Where a column crosses a row, a point of intersection is formed - a matrix element - providing specific information about the subject of the matrix. With this tool, all the most relevant aspects of a subject can be systematically arranged into one coherent "model of order", thereby revealing the structure of the subject in the simplest and most comprehensive way. (refer to Study Guide, pg 96. & 'The Science of the Oneness of Being', Pg 255, Kappeler)

model:	Structural design. Pattern, paradigm, example, representation, ideal. Something perfect of its kind. Pattern may suggest a clear or detailed archetype or prototype. Exemplar indicates either a faultless example to be emulated or a perfect typification. Ideal indicates the best possible exemplification either in reality or in a mental conception. A hypothetical description used in analyzing or explaining something; an imitation of something already existing on a large scale.
mode:	Manner or form of being, doing, etc., way.
rheomode:	Coined by David Bohm ('Wholeness and the Implicate Order') by combining the Greek word 'rheo' meaning 'to flow' with 'mode' in order to develop a language in which movement has first priority in our thinking, allowing the verb to play a primary role.
* resonate:	Rheomode language, altering the noun 'reason' in order to convey a resonate state of reason. The reverberations of Mind.
* revelate:	Rheomode language, altering the noun 'revelation' in order to convey the Self-revelatory capacity of Being.
* relevelate:	Rheomode language, re-elevate, meaning 'to lift into attention' so that the content thus lifted stands out in relief.
monographic:	mono: one; graph: letter. One letter at a time. One place value at a time. The consideration of one isolated, separated part in distinction to the consideration of the integrated whole.
omnipotent:	omni: all; potent: power; Almighty; all powerful.
omnipresent:	The state of being present in all places at all times.
omniscient:	Having infinite awareness, understanding and insight.
order:	A sequential arrangement of mathematical elements.
paradigm:	A universally recognized scientific achievement that for a time provides model problems and solutions to a community of practitioners. (Thomas Kuhn: 'The Structure of Scientific Revolution') A framework of thought; a scheme for understanding and explaining certain aspects of reality.
paradigm shift:	A distinctly new way of thinking about old problems. A new principle is introduced, a new and more comprehensive perspective taken. (Marilyn Ferguson: 'The Aquarian Conspiracy')
pattern:	A fully realized form, original, or model accepted or proposed for imitation. Archetype; plan; a natural configuration.
prism:	A transparent body bounded in part by two plane faces that are not parallel used to deviate or disperse a beam of light; something that refracts light or produces an effect suggestive of a spectrum.
stroboscope:	Gk. 'strobos', action of whirling + 'scope', the field of vision. Ability to envision or focus upon; specific configurations within the whole; actualizing the form of those configurations.
structure:	From 'structura' = to arrange, to fit together, ordering "Something having a fixed pattern of organization; arranged in a definite pattern." "The interrelation of parts as dominated by the general character of the whole."

"a self-stabilizing energy event complex" (Buckminster Fuller: 'Synergetics')

- structuralism: "is that method of procedure which transforms every problem into a structural problem." (Amar) "theory emphasizing the importance of structure as contrasted with function. "a point of intersection is not a thing but a relationship" (Webster)  
"... a structure is a system of transformations. Inasmuch as it is a system and not a mere collection of elements and their properties, these transformations involve laws: the structure is preserved or enriched by the interplay of its transformation laws, which never yield results external to the system nor employ elements that are external to it. In short, the notion of structure is comprised of three key ideas: the idea of wholeness, the idea of transformation, and the idea of self-regulation." (Jean Piaget: 'Structuralism')
- synergy "syn" = together, "ergon" = working = to work together. "the behavior of whole systems unpredicted by the behavior of their parts taken separately."
- synergy principle: "the whole is an immaterial network of relationships which make the whole greater than the sum of its parts."
- synergetics: "integrated behaviors instead of all the differentiated behaviors of natures galaxy systems and galaxy of galaxies." (Buckminster Fuller: 'Synergetics')
- system: "a complex unity formed of diverse parts subject to a common plan or sensing a common purpose." "an aggregation or assemblage of objects joined in regular interaction or interdependence." "An orderly working totality." (Webster)  
"the component events of an aggregate exist and operate in unison or concord according to a coherent plan for smooth functioning." (Buckminster Fuller: 'Synergetics')  
"systems are integrated wholes whose properties cannot be reduced to those of smaller units." "Natural systems are wholes whose specific structures arise from the interactions and interdependence of their parts." (Fritjof Capra: 'The Turning Point')
- universe: "the comprehensive, historically synchronous integral-aggregate system." (Buckminster Fuller: 'Synergetics')

The "Chart" herein contained,\* the symbolic representation of the model of Being, was conceived by John W. Doorly, as he elucidated the scientific system which underlies the Science of Christian Science.\*

The structural understanding of this Science, inclusive of the laws of the model of Being were the contribution of Max Kappeler and can be found in their pure essence in his book 'The Four Levels of Spiritual Consciousness'\* as well as the tape recordings of his summer school presentations on 'The four levels of Science: their practical implications'\* and 'The structure of Being and its laws,'\* all of which are recommended for those who have not had the opportunity to be exposed to them.

This holistic presentation was born in deep devotion to the model of Being and its laws. May it convey the depth of my gratitude for all that has gone before, without which this work\* would not have been possible.
