Age and related topics from Frederick L Rawson Treatment or Healing by True Prayer text used in treatment

Old Age

There is no old age, for man always has existed and always will exist, a perfect being in a perfect world, governed by a perfect God, having Life eternal. Man is God's consciousness, as infinite as God; he reflects Life and has all power and strength; he reflects Mind and is ever active and ever energetic. None of his organs can be worn out, as all are spiritual and perfect, reflecting Life and substance, ministering to man and benefiting man, giving him infinite joy and happiness as he moves in thought joyously in the realm of Mind. (See Stiffness). P. 182-183

Muscles

There are no weakened muscles, man's muscles arc God's thought forces, having absolute power and strength. Man's muscles cannot be stretched, for all God's ideas arc in the right place, ministering to man and benefiting man. Man's muscles never fail to act properly, they arc ideas of God, divine; no nerves can ever cause the muscles to work improperly, for man's nerves are spiritual, ministering to man and benefiting man. There is no want of co-ordination, for all ideas arc governed by the one Mind, God. P 167

Organs, Internal

Man's internal organs (or whatever organ is out of place) are never out of place, they are always in place, working perfectly, ministering to man and benefiting man; the organs never cause trouble, they are ideas of God, spiritual and perfect, doing their work perfectly, giving man joy and happiness. (Work against symptoms such as weakened muscles, old age) p 185 (removed partial)

Stiffness

There is no stiffness, man moves from idea to idea with absolute ease and power; nothing can stop the movement of man's limbs, man's limbs arc his power of moving from idea to idea, God's power, spiritual and perfect, working perfectly with unfailing regularity and ease. No muscles can ever be stiffened, man's muscles arc God's thought forces, delighting man in their suppleness of movement. There are no hardened tissues, man's tissues are spiritual, ever active, reflecting Life and Mind, and every quality of God. (Work against poison and matter and for circulation of the blood, and nerves.) (Sec Neck.) p 231-232
