

Japanese Girl Operates Calculator At Speed Of 9 Hits Per Second which is 400 kmph (249 mph) which is faster than a Ferrari which tops out at 360 kmph (224 mph).

With advancement in technology, smartphones have replaced calculators almost everywhere. But amidst this, we have Japanese people, who still take calculators very seriously.

The way they use their calculators will leave you AWESTRUCK! Yes, Japanese people are masters in using calculators and some of them hit around 9 buttons per second, can you believe that?

They are swift and handle calculators with utmost perfection. Just like we have typing contests, Japan hosts calculator contests, to judge who is using them most accurately and quickly.

There are many calculator clubs and kids are required to go there after school. On Saturdays and Sundays, they practice this skill for almost 7 hours.

Asuka Kamimura enters the hyper-speed mode while using her calculator. Be it simple calculations or complex ones, Ansuka's speed is 9 hits per second. She works in a Nagasaki company and does accurate and speedy calculations.
